Logs

Getting Started

Don't worry, it's very easy to use. You only need **2 steps** to start running the software.

Step 1: Inside the target folder, create a new folder named "image", and place all your images inside it.

Getting Started

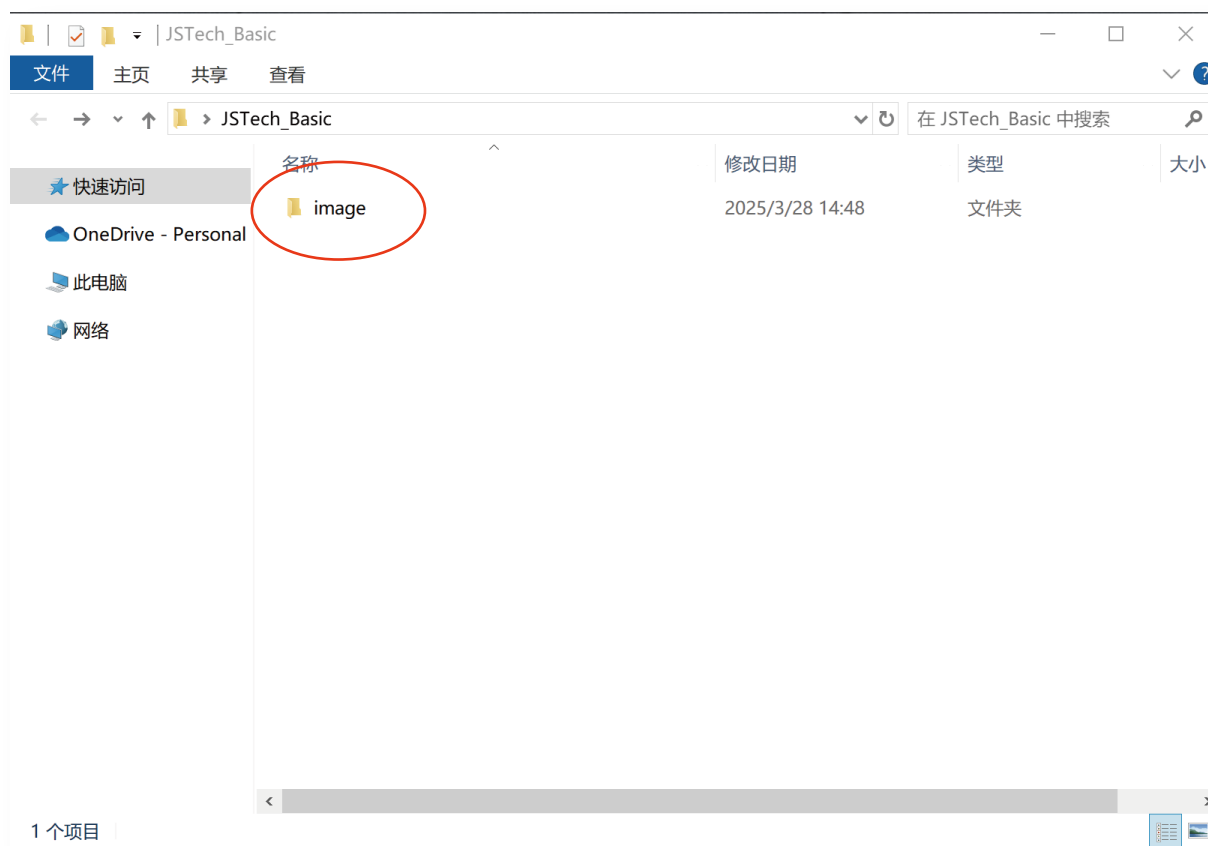

Don't worry, it's very easy to use. You only need 2 steps to start running the software.

Step 2: Double-click the icon to start using the software.

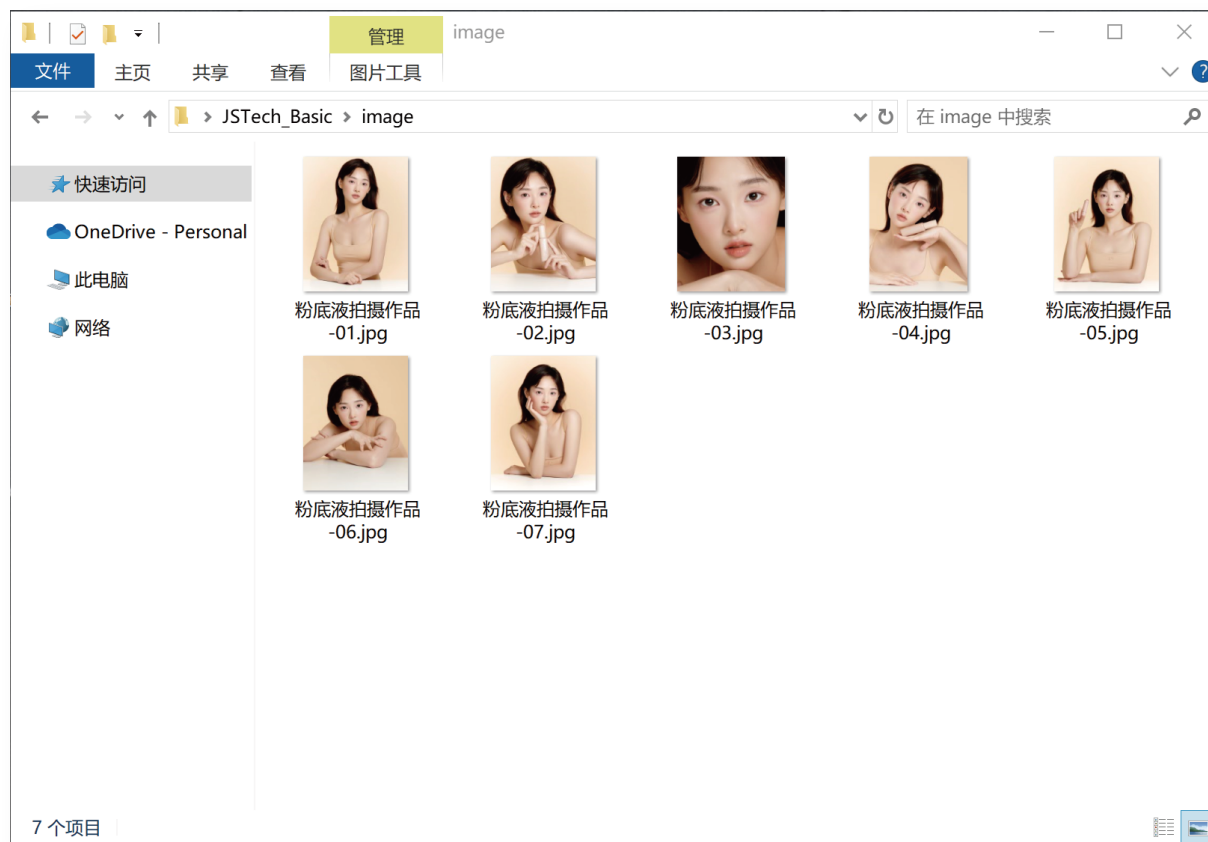

Required Folders

It is necessary to create a subfolder named "image" inside the target folder and place all the images you want to process in it.

Before Running the Program

Check the status of the images inside the image folder.

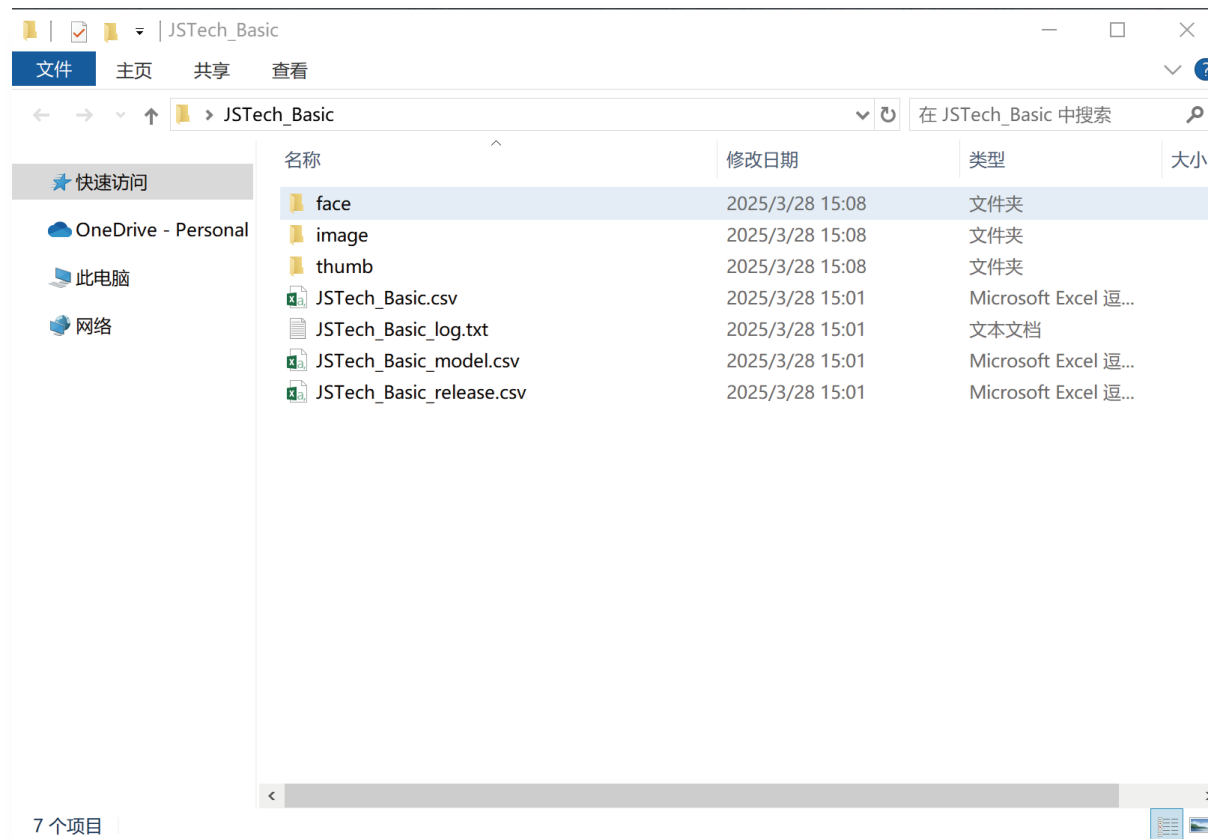

Running the Program

When the program is running, a command window will pop up on the desktop showing the program's status. **Do not close it.**

Program Output

After the program runs, you will find **2 folders**, **3 CSV data** files, and **1 TXT log** file in your target folder.

CSV Data Files

After the program runs, **3 CSV** data files will be added to your target folder:

1. The CSV file with the same name as the folder contains the **Description**, **Keywords**, and **Categories** information for each image.
2. If your images contain portraits, two additional CSV files will be generated. The `_release.csv` file includes the **model information** corresponding to the images.
